

1. Generate a Custom Template

1. Generate a Custom Template

Enter a pricing condition type (e.g., PRO0) to instantly create a dynamic Excel file.

2. Edit Data in Excel

2. Edit Data in Excel

Download existing SAP pricing to modify or start with a blank template to create records.

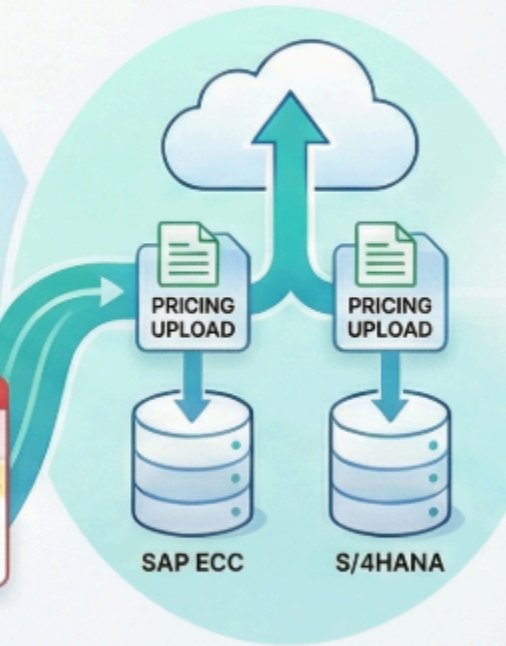

3. Validate with Simulation

3. Validate with Simulation

Run a simulation to get a line-by-line log, identifying errors before the final upload.

4. Upload Directly to SAP

4. Upload Directly to SAP

Once the simulation is clean, upload pricing directly into SAP ECC or S/4HANA.

The Final Outcome

Empowered Teams & Reduced Delays

This flexible, IT-independent tool keeps business moving smoothly without ticketing bottlenecks.
