

# Managing SAP Pricing Should Be Simpler.

Now, it is.

# The Old Way: A Cycle of Delays and Dependencies

Managing SAP pricing conditions often means getting stuck in a slow, frustrating loop.

Business teams identify a needed change, but can't act directly. They are forced to rely on IT, leading to a bottleneck that stifles agility.

# Every IT Ticket Is a Hidden Cost.

## Lost Momentum

Delays in pricing updates mean missed market opportunities and slow reactions to competitive moves.

## Risk of Error

Manual data entry and complex handoffs between teams create a high potential for costly mistakes in your live SAP system.

## Resource Drain

Your highly skilled business and IT teams spend valuable time on low-value administrative tasks instead of strategic initiatives.

# Introducing the DEBCOR Dynamic Pricing Conditions Load and Maintenance Tool

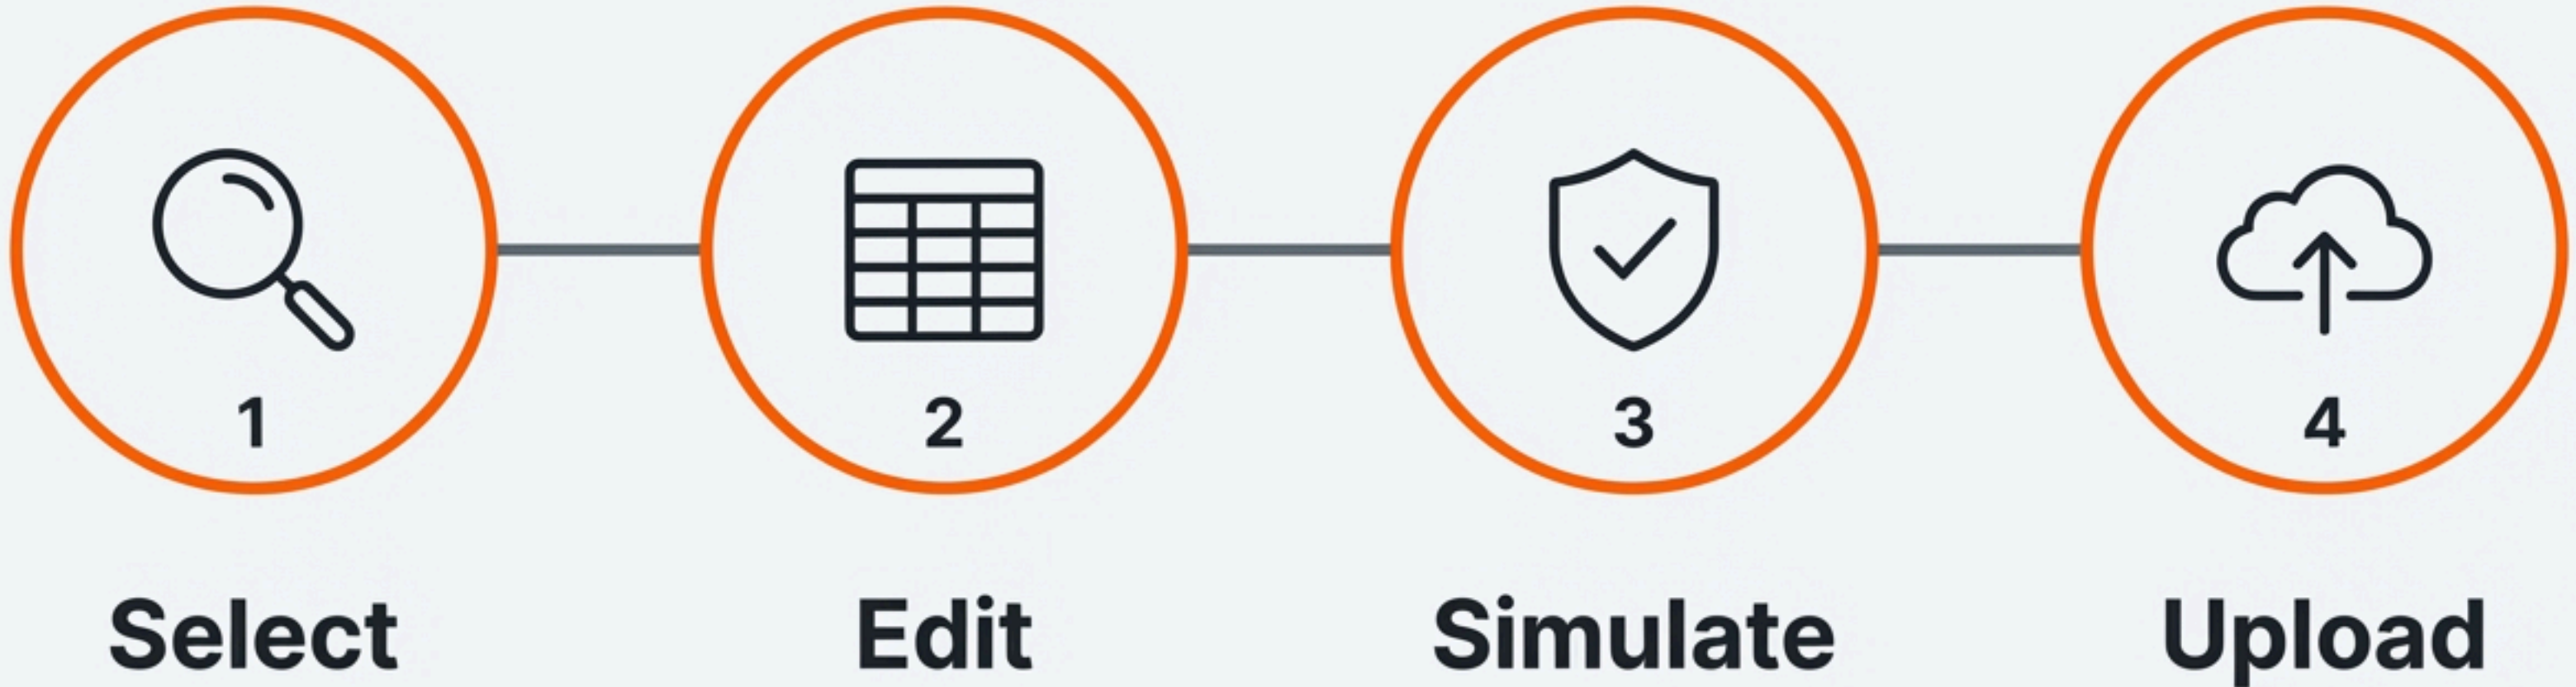

Take direct control of your SAP pricing.

# A Fully Self-Service Method for SAP Pricing.

Our tool empowers business users to download, edit, create, and upload SAP pricing conditions directly from Microsoft Excel. It works seamlessly with your system's existing configuration, providing a guided, IT-independent way to manage critical data.

- ✓ Handle pricing data quickly and accurately on your own.
- ✓ Eliminate the need for IT tickets for pricing updates.
- ✓ Work in the familiar, trusted environment of Excel.
- ✓ Compatible with SAP ECC and SAP S/4HANA Private Cloud.

# A Simple, Guided 4-Step Process.

## STEP 1: SELECT

# Instantly Generate Your Perfect Template.

Begin by entering the specific pricing condition type you need to work with (e.g., PR00 for price, ZREB for rebates). The tool instantly builds a dynamic Excel file, perfectly tailored to that condition and its access sequence, based on your company's live SAP configuration.

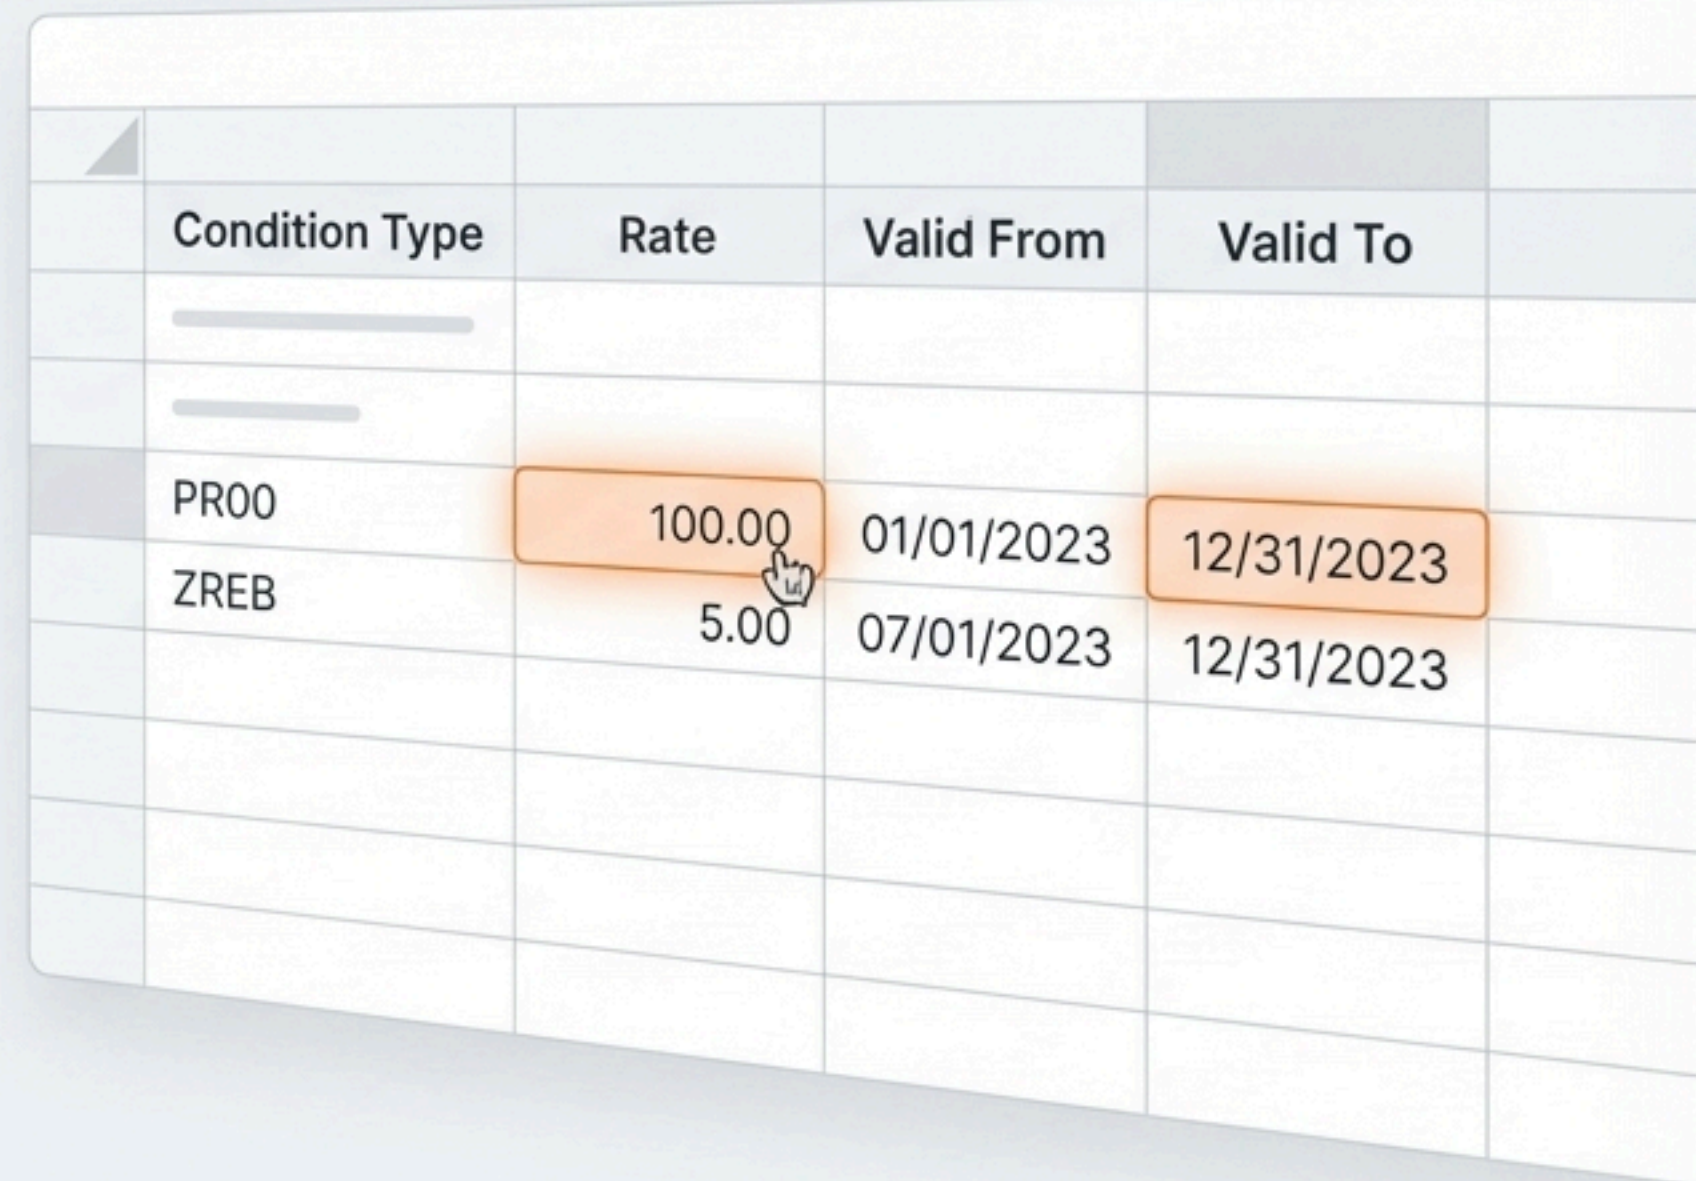

PR00|

## STEP 2: EDIT

# Modify and Create with Confidence in Excel.

Choose your path. You can download existing SAP pricing data to modify, or start with a blank, pre-formatted template to create new records from scratch. Update rates, validity dates, and key values in a format you already know and trust.

	Condition Type	Rate	Valid From	Valid To
	PRO0	100.00	01/01/2023	12/31/2023
	ZREB	5.00	07/01/2023	12/31/2023

## STEP 3: SIMULATE

# Validate Your Work Before Going Live.

Before committing any changes, switch to upload mode and run a simulation. The tool validates your work against SAP rules and generates a detailed, line-by-line log. You see exactly what will succeed and what needs correction, eliminating surprises and ensuring 100% accuracy.

### Simulation Results

- ✓ Line 1: Record valid. OK to upload.
- ✓ Line 2: Record valid. OK to upload.
- ✓ Line 3: Record valid. OK to upload.
- ✗ Line 4: Error - Invalid date range. Needs Correction.
- ✓ Line 5: Record valid. OK to upload.

## STEP 4: UPLOAD

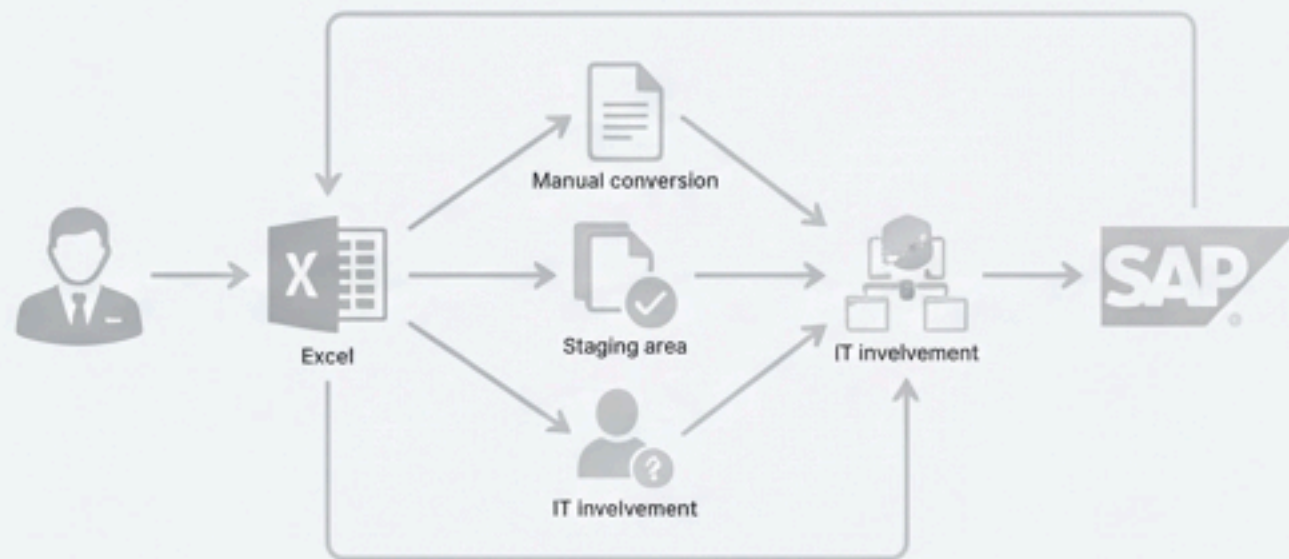

# Load Directly and Securely into SAP.

Once your simulation is clean, the final step is simple. Just untick the simulation box and upload. Your pricing conditions are loaded directly into SAP ECC or SAP S/4HANA Private Cloud, instantly and accurately.

# From Complex Bottleneck to Direct Control.

## The Old Way

## The New Way

# A Solution Built by Platinum-Level SAP Experts.

The Dynamic Pricing Tool is a product of DEBCOR Engineering, a platinum-level SAP consulting partner. For over 28 years, we have helped global enterprises modernize, optimize, and accelerate their SAP landscapes with solutions that are fast, secure, and built to last.

# Proven SAP Mastery, By the Numbers.

**28+**

Years of dedicated SAP experience.

**1,200+**

Years of combined consultant expertise.

**14**

Published SAP books used in universities worldwide.

**Countless**

Successful S/4HANA migrations, AI deployments, and BTP implementations.

# **Your Partner for Clarity, Innovation, and Long-Term SAP Success.**

We combine deep expertise with prebuilt products, solution templates, and automation tools to reduce implementation time and risk while improving your ROI.

We are the trusted partner for organizations across manufacturing, retail, medical devices, and financial services.
